Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.

There have been no projects in the Village which exceed the threshold for single family residential post construction stormwater management. There are potentially 2 projects in the Village which could require a SWPPP Erosion Control Plan <1 acre <5 acre of clearing.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

A single project planed clearing approximately 2 acres to reconstruct existing bulkhead and construct a new home. The site was inspected and the owner/applicant was instructed to take immediate corrective action. Corrective action to repair Erosion Control and Site Recording keeping was taken.

F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).

During the 2019-2020 reporting period the Site Plan approval process will be adjusted to include a clear statement on the record that the project is subject to SWPPP regulation and no permit for construction will be issued prior to MS4 approval of the EC plan and applicant/contractor obtaining General Permit Coverage via NOI submission. A CO for the structure will not be issued prior to full stabilization and NOT submission. The building inspector will be informed regarding procedures.

For each operation/facility indicate whether the operation/facility has been addressed in the MS4's/Coalition's Stormwater Management Program(SWMP) Plan and whether a self-assessment has been performed during the reporting period. A self-assessment is performed to: 1) determine the sources of pollutants potentially generated by the permittee's operations and facilities; 2) evaluate the effectiveness of existing programs and 3) identify the municipal operations and facilities that will be addressed by the pollution prevention and good housekeeping program, if it's not done already.

B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.

The (2) new East Shore Road basins have been installed and drainage interconnections have been repaired. A french drain was added to the south catch basin to capture sheet flow from an adjacent single family home slope and pond. Both basins will be fitted with FABCO units in June 2019. The basins at Kaness Lane have been scheduled for 2019-2020 reporting period.
